Introduction to the “new” USUHS Service Desk/CMDB

CA Service Desk Manager r12.5
General:
The Uniformed Services University of the Health Sciences (USUHS) is moving from a local instance of HEAT ticketing system to the enterprise-class USUHS Service Desk/CMDB running CA Service Desk Manager r12.5.

There are changes in the process for opening and managing “tickets”.

The major change is the implementation of Service Desk that follows the Information Technology Infrastructure Library (ITIL) methodology. For additional information on ITIL search the internet for “ITIL”. This will include:

**Incidents** are opened when a customer has a loss in service or cannot do their job because of software or hardware failure. Customers will be allowed to open Incident using the Self Service feature of the USUHS Service Desk/CMDB.

**Requests** are opened when a customer has a request for a new or a change to an existing service, software application, hardware device, or account. Customers will be allowed to open Requests using the Self Service feature of the USUHS Service Desk/CMDB.
Introduction to the Employee Home Page

This is the Employee Home Page of the Service Desk; it consists of:

1. **Announcements:** Any Announcements for the user population.
2. **Search for Solution:** used to search the Knowledge Base for solutions.
3. **Top Solutions:** Where the most frequently accessed Knowledge Documents will be listed.
4. **Online Customer Service Center User Guide:** guides customers through the user of the self-service interface.
5. **Open an Incident:** if you cannot do your job.
6. **Open a Request:** if need something new or a change to an existing service or product.
7. **Look at my existing Incidents and Requests:** Any Incidents or Request you have open at this time.
How to Open a New Incident

To open a new Incident; select “Create Incident” button and the new Incident Detail window will open.
1. Confirm the “Phone Number” and modify it if needed.
2. Confirm the “Email Address” and modify it if needed.
3. Confirm the “Location” and modify it if needed.
4. Select an Category (Incident Area):
5. Enter a Description of the Incident

**NOTE:** It is very important that an Incident be “categorized” correctly since it also assigns the Support Group who will be doing the work; we do this with the selection of the Incident Area. Selecting an Incident Area will usually require “Walking the Incident Area Tree”. In the image below is the first level of the “Tree” with some descriptions to assist you in “walking the Tree”.

**Incident Area**
- **Blackberry** - Any blackberry issues.
- **Computer** – Any issues involving the computer including hardware and software.
- **Email** – All issues related to email including AKO and Outlook.
- **Forms and Pubs** – Issues related to electronic forms and ARIMS.
- **Network** – All network related issues including connectivity and wireless.
