**Joseph Carvalho Jr., MD, Selected as New Henry M. Jackson Foundation for the Advancement of Military Medicine President, CEO**  
***Army Major General, Joint Staff Surgeon is Graduate of 'America's Medical School'***

**Bethesda, Md.** – Army Major General (Dr.) Joseph Carvalho, Jr., a 1983 graduate of the F. Edward Hebert School of Medicine ("America's Medical School"), Uniformed Services University of the Health Sciences (USU), was selected as the next president and chief executive officer of HJF, effective September 1, according to an announcement today by Mr. Philip Odeen, chair of the Henry M. Jackson Foundation for the Advancement of Military Medicine (HJF) Council of Directors. Carvalho is currently the Joint Staff Surgeon at the Pentagon and chief medical adviser to the Chairman of the Joint Chiefs of Staff, providing recommendations to the Chairman, the Joint Staff and Combatant Commanders on a wide range of medical and readiness issues.

"The members of the Council of Directors were pleased by the quality of applicants for this position, which made the selection of the Foundation's next leader incredibly challenging. However, Dr. Carvalho's vast experience, talent and commitment to continue HJF's extraordinary service to military medicine and public health made him the clear choice for this role," according to Odeen's announcement. "Dr. Carvalho is a dedicated military physician with the experience and proven leadership skills to guide our company to a promising future."

"The members of the Council of Directors were pleased by the quality of applicants for this position, which made the selection of the Foundation's next leader incredibly challenging. However, Dr. Carvalho's vast experience, talent and commitment to continue HJF's extraordinary service to military medicine and public health made him the clear choice for this role," according to Mr. Odeen's announcement. "Dr. Carvalho is a dedicated military physician with the experience and proven leadership skills to guide our company to a promising future."

For more than 30 years, Carvalho he has served the U.S. Army in various leadership positions, including commanding general of the Southern Regional Medical Command and Brooke Army Medical Center, the Northern Regional Medical Command, and the Army Medical Research and Materiel Command and Fort Detrick in Maryland. Before becoming Joint Staff Surgeon, he was Army Deputy Surgeon General and Deputy Commanding General (Support) of the U.S. Army Medical Command. Clinically, Carvalho has held positions as a staff internist, nuclear medicine physician and cardiologist.

"I am deeply humbled to be selected to join the Henry M. Jackson Foundation," Dr. Carvalho said. "I consider this a great privilege to continue working with USU and the military services to advance medical research for our Nation's service members."

"I am absolutely thrilled to learn of Maj. Gen. Carvalho's selection as the new President and CEO for HJF," added USU President Dr. Richard W. Thomas. "In addition to being 'one of our own,' he brings an abundance of experience, energy and talent to the organization. I have known Dr. Carvalho for many years and have the highest regard for him and confidence in his leadership qualifications. He is uniquely qualified to lead the HJF and will be a tremendous asset for the University as we face the future together."

Dr. Carvalho will replace Mr. John W. Lowe, who retired in May after 25 years as HJF's leader.

### **About USU**

The Uniformed Services University of the Health Sciences, founded by an act of Congress in 1972, is the nation's federal health sciences university and the academic heart of the Military Health System. USU students are primarily active duty uniformed officers in the Army, Navy, Air Force and Public Health Service who have received specialized education in tropical and infectious diseases, TBI and PTSD, disaster response and humanitarian assistance, global health, and acute trauma care. A large percentage of the university's more than 5,800 physician and 1,000 advanced practice nursing alumni are supporting operations around the world, offering their leadership and expertise. USU also has graduate programs in biomedical sciences and public health, most open to civilian and military applicants, and oral biology, committed to excellence in research. The University's research program covers a wide range of clinical and other topics important to both the military and public health. For more information about USU and its programs, visit [www.usuhs.edu](http://www.usuhs.edu).
