

About USU

The Uniformed Services University's F. Edward Hébert School of Medicine is **America's Medical School** and is committed to excellence in military medicine and public health during peace

and war. USU is located on the grounds of the **Walter Reed National Military Medical Center in Bethesda, Maryland.**

USU is a unique medical school with a focus on health promotion and disease prevention. The school has a **year-round, four-year curriculum with nearly 700 hours of military unique medical instruction.** In addition to traditional topics such as organ based health and illness, these extra hours focus on **epidemiology, tropical medicine, emerging infectious diseases, leadership and field exercises, disaster medicine** and other subjects.

UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

F. Edward Hébert School of Medicine

America's Medical School

Learning to Care for Those in Harm's Way

OWE SERVICE, NOT MONEY. MEDICAL SCHOOL WITHOUT DEBT.

A Debt-Free Education

Students attending USU can focus on their education without the worry of incurring debt. Medical students enter the University as commissioned officers in the Army, Navy, Air Force, or Public Health Service. No prior service is required for admission to USU. **Students pay no tuition or fees and receive the full salary and benefits of a uniformed officer (approximately \$65,900 with dependents; \$62,192 without)** throughout their four years in exchange for a **seven-year active duty service commitment**. These benefits include **free medical care** for students and dependents and **30-days paid leave annually**. Books and laboratory equipment are provided.

Prior to matriculation, incoming students without previous military experience attend a **four-to-six week officer orientation** program where they learn about the customs and traditions of life in their respective services, as well as the responsibilities of a uniformed officer. This orientation provides students with a transition to the uniformed services.

Upon graduation, students are promoted to the rank of Captain (Army/Air Force) or Lieutenant (Navy/PHS) and **earn approximately \$82,535 with dependents; \$78,755 without**.

Molecules to Military Curriculum

USU's new curriculum is divided into a 16-month pre-clerkship, 12-month core clerkship, and 17-month post-clerkship period. All of these periods incorporate **specialized instruction and training related to the unique aspects of military medicine** supplementing traditional medical school topics. Classes are graded **Honors, Pass, or Fail**. For more information, please visit www.usuhs.edu/curriculum.

Why USU?

Welcome to USU. Here you will find a dedication to medicine and service like no other. Our students are driven, passionate and bound together by a camaraderie only found among those in the Uniformed Services.

- **World-class medical education from faculty who have practiced around the globe**
- **Medical education + leadership training + global health + medical diplomacy**
- **Commissioned officer with active duty salary and benefits > \$62K**
- **Service to country: Army, Navy, Air Force or Public Health**
- **Guaranteed graduate medical education (internship)**

Q & A

Will I have to go to boot camp?

No. Students who have not previously served as officers attend training during the summer before attending USU. This involves classroom lessons on service traditions, physical training, learning to march, salute, wear the uniform, and the military medical system.

What are the physical requirements?

The services have different physical readiness requirements. You will have to pass the initial physical examination (medical exam) and complete twice yearly physical fitness tests.

Will I be pulled out of medical school to go to war?

No. Your job is to be a student.

What about family?

The military is committed to family, and military bases have excellent childcare and family services. Military doctors have more say in where they go and what they do, so they have more career flexibility to suit their family's needs.

How do military residencies compare to civilian programs?

Military residencies are very competitive with university-based residencies, and military residency graduates have among the highest first-time pass rates on specialty board certification exams.
