MEMORANDUM FOR MTN PROGRAM DIRECTORS AND PROGRAM ADMINISTRATORS
(BLS, ACLS, PALS)

SUBJECT: AHA 2010 Guidelines Science Updates - CD Version Now Available for In-person Updates

1. The Military Training Network (MTN) requested and was approved by the American Heart Association (AHA) to offer our Training Sites a CD version of the On-line 2010 Science Updates for Instructors. This was done to meet the diverse needs of our Training Sites who are unable to access the On-line Updates through either the AHA Instructor Network (IN) or Professional Education Center. MTN Program Directors/Program Administrators may request the CD through their respective MTN Program Manager.
2. **Using the CDs:** MTN Training Sites who can't otherwise access AHA's on-line Science Updates may use the CD to provide in-person updates to their Instructors. Program Directors will need to generate certificates of completion for their Instructors or track completion on their own. Also, there is no test with the CD version. While AHA's on-line update is the preferred method, the CD offers an option for those Training Sites who can't access the AHA IN or Professional Education Center.
3. As a reminder, per AHA guidance, Instructors have until April 1, 2011 to complete an official Update for each discipline they teach. Courses taught after April 1, 2011 must incorporate new science.
4. Training Sites who are unable to access the IN may also request the 2010 Interim Training Videos from the MTN Program Managers. Use these videos in classes as instructed in the Interim Course Lesson Map Changes Guides.
5. Contact the respective MTN Program Manager at (301) 295-0964 or DSN 295-0964 for questions or additional information.
