First Military Operational and Readiness Precision Medicine Research Conference to be Held

**WHAT:** Military Operational and Readiness Precision Medicine research conference

**WHEN:** May 30, 2017, 11 a.m. – 5 p.m. and May 31, 2017, 8 a.m. – 5 p.m.

**WHERE:** William F. Bolger Center, 9600 Newbridge Drive, Potomac, Maryland

**WHY:** The meeting is designed to bring researchers, scientists and policymakers together to present the state of the science related to the most prevalent research opportunities in the field of precision medicine that will advance the operational readiness for the warfighter and the communities they serve. In addition, presentations from researchers at several military training facilities that are at the forefront of precision medicine, other Federal and non-Federal entities, including the pharmaceutical and technology industries. This is also an opportunity for students and early career investigators to learn about the various technologies associated with precision medicine research. A strong focus will be placed on cohorts, precise registries and medical decision-making. The second day will also include a two-hour session with interdisciplinary discussions on next steps for shaping a consolidated research agenda to advance military precision medicine across DoD and the Services.

**Sessions include:**

- Keynote addresses: “How Wellness Can Transform Healthcare” by Dr. Leroy Hood, Senior VP and Chief Science Officer, Providence St. Joseph Health and President, Institute for Systems Biology; and “Why Precision Medicine: Relevance to the Military” by former Air Force Surgeon General ret. Lt. Gen. (Dr.) C. Bruce Green, managing director and Chief Federal Medical Officer, Deloitte Consulting, LLP; “Building a Platform for Precision Medicine Research” by Dr. Stephanie Devaney, Deputy Director of the All of Us Research Program, NIH, and former Project Manager, Precision Medicine Initiative for the White House

- Operational Precision Medicine for the Warfighter

- Precision Medicine and Healthcare

- Challenges in Conducting Precision Medicine Research

- Education, Community Engagement and Training in Precision Medicine
Precision Medicine: The Convergence of Research Cohorts and Value-based Healthcare

Each session includes presentations by a number of speakers, followed by a moderator-led discussion. Media interested in attending should contact Sharon Holland or Sarah Marshall. Contact info is listed above.

About the Uniformed Services University of the Health Sciences

The Uniformed Services University of the Health Sciences, founded by an act of Congress in 1972, is the nation’s federal health sciences university and the academic heart of the Military Health System. USU students are primarily active duty uniformed officers in the Army, Navy, Air Force and Public Health Service who receive specialized education in tropical and infectious diseases, TBI and PTSD, disaster response and humanitarian assistance, global health, and acute trauma care. A large percentage of the university’s more than 5,800 physician and nearly 1,000 advanced practice nursing alumni are supporting operations around the world, offering their leadership and expertise. USU also has graduate programs in biomedical sciences and public health committed to excellence in research, and in oral biology. The University’s research program covers a wide range of clinical and other topics important to both the military and public health. For more information about USU and its programs, visit www.usuhs.edu.
